

Private House, West Hampton, New York

Client: Private

A new house currently being built on the edge of the historic village of Westhampton on Long Island. This timber frame building will use traditional materials such as cedar shingles and timber sash windows. Built in the local vernacular the house now on site and due to be completed in Autumn 2018. The new house replaces a poorly constructed 1970's house and had to conform to a myriad of local codes with regard to size and materials. Internal features include a hardwood staircase, stone chimneypieces and parquet flooring.
